Regarding the use of private options, Community Health Fund membership in 2005 was estimated to be 126,000, a figure that is still well below the target of 100,000 set by the Government. Membership of the CHP decreased by 62% to 99,300 in 2006. This reflects a rise of 8% during the period, and it is worth noting that the overall increase is lower than that of the previous year.
